APSIPA ASC 2018 ([www.apsipa2018.org](http://www.apsipa2018.org)) will be the tenth annual conference organized by the Asia Pacific Signal and Information Processing Association (APSIPA). Founded in 2009, APSIPA aims to promote research and education in signal processing, information technology, and communications.

A biosignal is any signal in living beings that can be continually measured and monitored. The term biosignal is often used to refer to bioelectrical signals, but it may refer to both electrical and non-electrical signals. The usual understanding is to refer only to time-varying signals, although spatial parameter variations (e.g. the nucleotide sequence determining the genetic code) are ...

The Department of Biomedical Informatics is committed to improving biomedical research and clinical care through the innovative application of informatics. Currently funded projects explore areas such as genomic and proteomic data mining, natural language processing, machine learning, and biosurveillance.

Medical imaging is the technique and process of creating visual representations of the interior of a body for clinical analysis and medical intervention, as well as visual representation of the function of some organs or tissues ( ). Medical imaging seeks to reveal internal structures hidden by the skin and bones, as well as to diagnose and treat disease.
