Visual Studio includes a debugger that works both as a source-level debugger and as a machine-level
debugger. It works with both managed code as well as native code and can be used for debugging
applications written in any language supported by Visual Studio. In addition, it can also attach to running
processes, monitor, and debug those processes. If source code for the running process is ...

Vision provides a primary sensory input for food perception. It raises expectations on taste and nutritional value and drives acceptance or rejection. So far, the impact of visual food cues varying in energy content on subsequent taste integration remains unexplored. Using electrical neuroimaging ...

Visual-Gustatory Interaction: Orbitofrontal and Insular

This paper is a review of optical methods for online nondestructive food quality monitoring. The key spectral areas are the visual and near-infrared wavelengths. We have collected the information of over 260 papers published mainly during the last 20 years. Many of them use an analysis method called chemometrics which is shortly described in the paper.
