In mathematics, a set  $B$  of elements (vectors) in a vector space  $V$  is called a basis, if every element of  $V$  may be written in a unique way as a (finite) linear combination of elements of  $B$ . The coefficients of this linear combination are referred to as components or coordinates on  $B$  of the vector. The elements of a basis are called basis vectors.. Equivalently  $B$  is a basis if its elements are ...

The geometric algebra (GA) of a vector space is an algebra over a field, noted for its multiplication operation called the geometric product on a space of elements called multivectors, which is a superset of both the scalars and the vector space .Mathematically, a geometric algebra may be defined as the Clifford algebra of a vector space with a quadratic form.
