CHAPTER 10 ROTATION 10-1 What is Physics? As we have discussed, one focus of physics is motion. However, so far we have examined only the motion of translation, in which an object moves along a straight or curved line, as in Fig. 10-1a. We now turn to the motion of rotation, in which an object turns about an axis, as in Fig. 10-1b.

CHAPTER 10

10-6 Conservation of Energy Optional Not Required The total kinetic energy of a rolling object is the sum of its linear and rotational kinetic energies: The second equation makes it clear that the kinetic energy of a rolling object is a multiple of the kinetic energy of translation.
