This response selection process is biased by input from the goal system. A habit develops gradually as the network repeats the same sequence of responses while learning to attain goals in a particular environment. Eventually, the habit system becomes capable of performing a sequence autonomously without goal input.

Psychology of Habit - Semantic Scholar

habit formation, and so we can be relatively confident that your habits follow the same cycle.) Let me show you what the 3 R's look like in real life by applying the framework to a typical habit. (In this case, answering a phone call.) Step One: Your phone rings (reminder). This is the reminder that initiates the behavior.
