### **Helpful Information - Trisomy 18, Trisomy 13 and Related**

Approximately 5 percent of people with trisomy 18 have an extra copy of chromosome 18 in only some of the body's cells. In these people, the condition is called mosaic trisomy 18. The severity of mosaic trisomy 18 depends on the type and number of cells that have the extra chromosome.

### **Trisomy 18 - Genetics Home Reference - NIH**

Genetics. Trisomy 18 occurs when there are three copies of chromosome 18 in every cell of the body. Typically, humans have two copies of chromosome 18. Sometimes, a baby will inherit an extra chromosome from a parent. Therefore, the baby has three copies of chromosome 18 rather than two copies. In the diagram above,...

/ Impact of Trisomy 18 on Baby? Impact of Trisomy 18 on Baby? The extra genetic material from the extra eighteenth chromosome can cause a wide variety of problems (sometimes referred to as birth defects) in the developing child in the mother's<sup>TM</sup> womb and after birth.

## **Impact of Trisomy 18 on Baby? <sup>TM</sup> Trisomy 18 Foundation**

In the case of trisomy 18, the baby has three copies of chromosome 18. This causes many of the baby's organs to develop in an abnormal way. There are three types of trisomy 18: Full trisomy 18. The extra chromosome is in every cell in the baby's body. This is by far the most common type of trisomy 18.

## **What is Trisomy 18? Causes, Diagnosis, and More**

Radiographic Findings One can predict the radiographic findings from an understanding of embryonic abnormalities and clinical features. A review of our series of 8 cases of trisomy 13<sup>15</sup> and those reported in the literature (14, 18) revealed a broad spectrum of radiographic abnormalities.
